

Thank you
for choosing

Jane

BLUE
LED

Jane F can clone and replace fixed code remotes with frequency 433.92MHz

Jane F is as efficient as the original remote or more because designed to transmit 433.92 Mhz frequency, only

DUPLICATION

- Place the original remote pointing the **B area** of **Jane F**
- Press and hold one of the **A button**, that you want duplicate
- After 6 seconds, the **blue LED** starts to flash, entering in clone mode
- When the **blue LED** flashes, press and hold the channel's button of original remote and wait till **Jane's blue LED** stops to flash and becomes fixed

When the **blue LED** becomes fixed it means that the original code has been cloned and transmitted from original remote into **Jane F**

- Then, the blue led remains steady for 2 seconds and then it turns off
- Release the **A button** and the button of the original remote
- Then duplication is complete

To duplicate the code from a second channel choose another **A button** and repeat the operation.

If the **blue LED** after flashing turns off, it means that cloning process is not active and it maintains the original code or the code previously duplicated.

Repeat then the operation, pressing the button of external remote immediately after the **blue LED** starts to flash.

Every single channel - button of **Jane F** is combined to a basic code different than each other. These basic codes are programmed to recognize and match the **RXJF-2C** receiver. During cloning process any single channel-button of **Jane F** will learn the new code transmitted by the external remote, and it deletes previous code. Deleting the basic code, the new code could be not compatible with **RXJF-2C** receiver.

COMBINED JANE F WITH THE 2 CHANNELS OF RXJF2C RECEIVER

Remove the top cover of the receiver so you can see the only button in the electronic card.

Channel 1

- Press and release the receiver's button to turn on the green led combined with channel 1
- Bring **Jane F** close to the receiver and press one of the **A button** to combined it with channel 1
- When the green led flashes one time it means that receiver is matched with **A button**

Channel 2

- se twice the receiver's button: the red led combined with channel 2 turns on.
- Bring **Jane F** close to the receiver and press another **A button** to combined it with channel 2
- When the red led flashes one time it means that the receiver is matched with **A button**

For more information please read receiver instructions

TECHNICAL FEATURES

Frequency	433,92 MHz
Power pack	lithium battery 3v (CR032)
Encoding	fixed code
Number of channels	2 - 4
Consumption in transmission	14 mA
Type oscillator	SAW

Guarantee: 24 months

Manufacturing and technology: 100% made in Italy

Declaration of conformity:

The undersigned Luigino Pellattiero, as legal representative of Italfile Srl, declares that remotes JF xxx-2/ JFxxx-4 have been manufactured according to the following standards:

Directive 2004/108/CE: known as Electromagnetic Compatibility directive

Directive 2002/95/CE: Known as directive RoHS

Therefore **Jane F** remotes are made in compliance with the current regulations.
